Stephen Hartley MCP

I'M STILL STANDING!

September 2017 Issue 08

My last newsletter was over 5 years ago. In that time I took a 6 month break from computers and didn't know if I would return. Return I did, to a new operating system, Windows 10. It is good, stable, secure and easy to use; meaning that for £400 you can get yourself a laptop to make you a digital contributor. Of course I'd recommend you use me to get it set up.

Testimonial: John Worth 2017

Stephen Hartley has been providing me with his PC expertise since he helped me set up my system in 2011.

If I have had a software or hardware problem, he has always been available to sort it out for me.

Normally this has been by way of a home visit, or advice over the phone, which is extremely useful.

He has responded quickly to my cries for help, and always arrives when he promised.

The advice and help provided has always been given with good humour. His charges are very reasonable for the expert help given.

I can thoroughly recommend his skills and service. John Worth

Does anyone actually read these things, I was going to think of some fascinating technological subject to talk about but you'd probably rather hear how my son is. Well he is good, playing football for Banbury United under 11's and doing good at school. He gets a lot of praise for his literature. Myself; I have been very productive with all the spare time my job affords. I have been mostly interested in the secrets of health and happiness and may have managed to save the world! Don't believe me? Check out my youtube channel: Faithfulphilosopher. But one must pay the bills and it appears there is still need for my problem solving skills even if it means allowing the bearded, dreadlocked, bathes once a week, God praising hippy into your house. At least you can trust me :D

Other Information:

Standard hourly rate - £30
Call out and fix 1 hour - £45
Journey charge outside of Banbury.
